Art Unit: 2165

Filed: 2/10/2004

Examiner: Mark Radtke

Title: EFFICIENT XML SCHEMA VALIDATION OF XML FRAGMENTS USING  
ANNOTATED AUTOMATON ENCODING

LETTER

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

Further to the telephone conversation with Examiner Radtke regarding the correct publishing of the patent to be issued from the above serial number, Applicants wish to note for the record that the published application 2005/0177543 for the above serial number was incorrectly printed with the wrong specification and claims. The published application document contains the specification and claims of an application which was submitted as an Appendix at the time of filing.

The Examiner has confirmed the correct specification and claims are to be printed, however, Applicants want the record to reflect the Publication Office was made aware of this error so that the patent to be issued from the above serial number does not also contain the wrong specification and allowed claims.

Applicants' Representative may be contacted at the below number with any questions.

Respectfully submitted,

*/ramraj soundararajan/*
